## HUMAN EVOLUTION LUNCH LECTURES

**10 March 2015 from 12.00 – 13.00**

AIAS, Høegh-Guldbergs Gade 6B, Bldg 1632, AIAS main hall.

*Adventures in Uganda: Chimpanzees, duikers and elephants, oh my!*

Presentations by **Prof. Peter Kjærgaard** and **Dr. Jessica Hartel** from the Centre for Biocultural History.

Our project focuses on the [Kibale Chimpanzee Project](#), the [Kibale Snare Removal Program](#), and the [Kasiisi Project](#) to address the benefits of long-term research on wildlife and community-based conservation. We are working collaboratively with the above research NGOs to develop a working model for understanding which conservation initiatives are most successful and sustainable. Come join us to see beautiful pictures of chimpanzees and Uganda while learning why conservation of species and local sustainability in the surrounding human populations is of utmost importance in Kibale National Park.

*The Human Evolution Lunchtime Lecture (HELL) series is organised by the Centre for Biocultural History. The series emphasises the stimulation of ideas, discussion and involvement across all disciplines broadly interested in human evolution and speakers come from a wide variety of backgrounds. All are welcome, at whatever level - feel free to invite friends and colleagues. Coffee / tea is provided; please bring your lunch.*
